Re: Letter of reference.

To whom it may concern:

I'd like to take a moment to express my gratitude to MVM Contracting and its employees. The quality of professionalism and organization on multiple projects over the last several years has been exceptional. These projects have included; directional boring of gas and power lines, site excavation, concrete work and road construction. MVM Contracting is also the key contributor in maintaining our fiber network, along with updating and expanding our camera and security systems.

Throughout our relationship with MVM Contracting, I can always rely on a high level of industry knowledge and the ability to overcome unforeseen issues. Their attention to detail and open lines of communication simplify the construction process. As we look to future projects, we are confident in our partnership with MVM Contracting.

Sincerely,

Ryan Carter
General Manager
